Informatic Engineer
Bumi Cabean Asri, Sidoarjo, Indonesia | galangarrauf22@gmail.com | 0895364773207

Profile

Informatic Engineer and full-stack developer (Laravel, Flutter) who builds scalable web and mobile applications and integrates local LLM-driven automation to streamline workflows. Proven track record in IT support and retail operations—implemented asset and inventory tracking systems and automation scripts that improved inventory accuracy, accelerated incident resolution, and reduced repetitive work. Consistently delivers client projects on schedule. Strong troubleshooting skills, cross-functional collaboration, and a focus on performance, reliability, and user-centered design.

Areas of Expertise

- | | | | |
|-------------------------|-------------------------|-------------------|------------------------|
| • Web Development | • Project Management | • Bot Automation | • Troubleshooting |
| • Mobile Apps (Flutter) | • Database Architecture | • AI Integrations | • Hardware Maintenance |

Professional Experience

IT Support Intern, Disnaker Provinsi Jawa Timur, Surabaya

Sept 2024 – Apr 2025

- Provided technical support to department staff by diagnosing and resolving hardware, software, and network issues to maintain uninterrupted operations.
- Managed IT support requests via a ticketing system, performing installations, updates, and routine maintenance to ensure timely resolution.
- Implemented an asset tracking system and standardized documentation, improving inventory accuracy and streamlining onboarding processes.
- Developed simple automation scripts to reduce repetitive tasks and accelerate incident response.
- Collaborated with vendors and the IT team to deploy equipment and support small IT projects and upgrades.

Store Manager, Pakanhouse, Sidoarjo

Oct 2025 – May 2026

- Managed daily retail operations including inventory control, merchandising, and customer service to ensure a seamless shopping experience.
- Implemented an improved inventory tracking system that reduced stock discrepancies and optimized reorder cycles.
- Recruited, trained, and coached store staff, driving performance to meet monthly sales targets and maintain high customer satisfaction.
- Analyzed sales and customer trends to adjust merchandising and promotions, improving overall store performance.

Full-Stack Freelance Developer, Sidoarjo

May 2025 – Present

- Develop and deploy custom web and mobile applications using Laravel and Flutter, delivering scalable and maintainable solutions for diverse clients.
- Translate client requirements into high-performance code and realistic project timelines, consistently delivering projects on schedule.
- Design intuitive UI/UX in collaboration with clients and integrate AI-driven features, including local LLM-based automation, to improve workflows.
- Provide ongoing maintenance, performance optimization, and client training to ensure long-term product success.

Personal Projects & Open Source Contribution, Sidoarjo

Jan 2026 – Present

- Develop local AI-driven automation systems integrating messaging APIs (WhatsApp) with Ollama and DeepSeek to automate tasks and improve response workflows.
- Built cross-platform applications (Flutter) and engineered backend architectures focused on scalability, reliability, and user experience.
- Led development of platforms such as Saving-Ku and sistenAI, handling backend engineering, integrations, and performance tuning.
- Contribute to open-source projects and prototypes to validate ideas and share improvements with the developer community.

Education

Politeknik Elektronika Negeri Surabaya, Surabaya

Informatic Engineering | Aug 2025 – Present

Ongoing Informatic Engineering studies focused on software engineering, system design, and applied AI. Key coursework: Data Structures & Algorithms, Databases, Operating Systems, Networking, Machine Learning, and Software Architecture. Active projects: building scalable backend services with Laravel, cross-platform mobile apps using Flutter, and integrating local LLMs for automation; contributor to open-source projects and campus tech initiatives.

SMKN 2 Buduran, Sidoarjo

Rekayasa Perangkat Lunak (Software Engineering) | Aug 2022 – May 2025

Focused vocational program in software engineering with hands-on experience in web and mobile development. Relevant coursework: Web Development, Mobile App Development, Database Systems, Networking, and Software Engineering principles. Practical skills: PHP, Laravel, Flutter, JavaScript, MySQL, Git, RESTful APIs, and basic AI/automation integrations. Completed a capstone project developing an end-to-end application and collaborated in team-based, Agile-style development.
